

Máire Cunningham, Head of Enterprise

Beauchamps

With over 30 practice and sector areas, Beauchamps LLP is one of Ireland's most progressive corporate law firms and has supported Irish businesses for nearly 220 years. Our commitment to understanding our clients' commercial requirements, coupled with accessible and responsive teams, is reflected in our clients', and our, continued successes. We believe that the best commercial outcomes are achieved from taking the time to really understand what drives our client's business.

Our Irish and international client base includes multinational companies, banks and financial institutions, investors, owner-managed businesses, private equity funds, venture capital funds, developers, housing authorities, energy providers, charities, regulatory authorities, governments, and public bodies. With a team of over 200 staff at our Dublin office, we are proud of this rare longevity, founded on our long-held reputation for quality, accessibility, and value for money.

Our firm has a particularly strong presence in the start-up ecosystem and, in addition to being Enterprise Ireland's external legal adviser on its equity portfolio, we advise a significant number of start-up and early stage companies across a broad range of sectors on fundraisings and all business legal related issues.

Máire Cunningham, Partner and Head of Inclusion and Diversity at Beauchamps, explains why the firm continues to support Starting Strong: *"In supporting Starting Strong, we draw together our expertise in advising entrepreneurs and companies at start-up and early stage with our commitment to inclusion and diversity in the world of business. We believe in the importance of getting it right from the beginning and are delighted to share our experience in this area with women-led businesses."*
