

Monika Wojtek

Montek Connection

Monika Wojtek is the Founder of BuildZon.eu and Montek Connection Ltd, an Irish company focused on importing building materials from Eastern Europe. Monika's unique skill is in understanding the barriers and communications issues between Eastern Europe and Ireland and her mission is to create a B2B online platform that offers a high quality, well-priced range of Eastern European manufactured products to customers in Ireland.

Prior to creating Montek/BuildZon, Monika graduated with an MBA from Trinity College (2019) and has a background in Project and Operations Management within the Construction Industry. Born in Poland with a degree in Engineering from Krakow University, she has an extensive network in Eastern Europe. Using this network, Monika continues to grow the business by constantly sourcing new suppliers, clients, and logistic solutions.

The concept for Montek/BuildZon was born out of Monika's own experience while working in the construction industry in Ireland for 10 years and noticing the price difference between products sold in Eastern Europe and Ireland. Identical products can be sourced in Eastern Europe at a minimum of 25% cheaper than in Ireland.

Monika has taken part in New Frontiers, NDRC workshops, UCC Ignite Programme and CIT EXXCEL Women Entrepreneurship Programme. Her hope is for Montek/BuildZon to become the #1 provider of high quality, competitively priced products to the Construction sector while providing fantastic customer service.
